

ALBO HESSAB MINI WEBPAGE

MILIYON T.
ADDIS ABABA UNIVERSITY, MATHEMATICS DEPARTMENT

OBJECTIVES

The main objective of this site is to help undergraduate Mathematics Major students here in Addis Ababa University. By providing resources that are very useful for the learning process. Such as

1. Course outlines
2. Lecture notes
3. Texts(Available)
4. Books
5. etc.

ETHIOPIAN NUMERALS

Do we really know our own numeral system?

$\bar{0} = 1$
 $\bar{1} = 2$
 $\bar{2} = 3$
 $\bar{3} = 4$
 $\bar{4} = 5$
 $\bar{5} = 6$
 \vdots

There are lots of ambiguity about Ethiopian Numerals. For example
Do ancient Ethiopians know the number zero?
There are more to be asked. I hope together we will find the answer to all this questions.
Let's Collaborate and see the difference.

ACKNOWLEDGEMENT

- [1] Miss Seble and Miss Fasika. *Thanks for your constructive comments.*
- [2] FS and Dr. Yismaw Alemu. Thank you for your encouragement.

INTRODUCTION

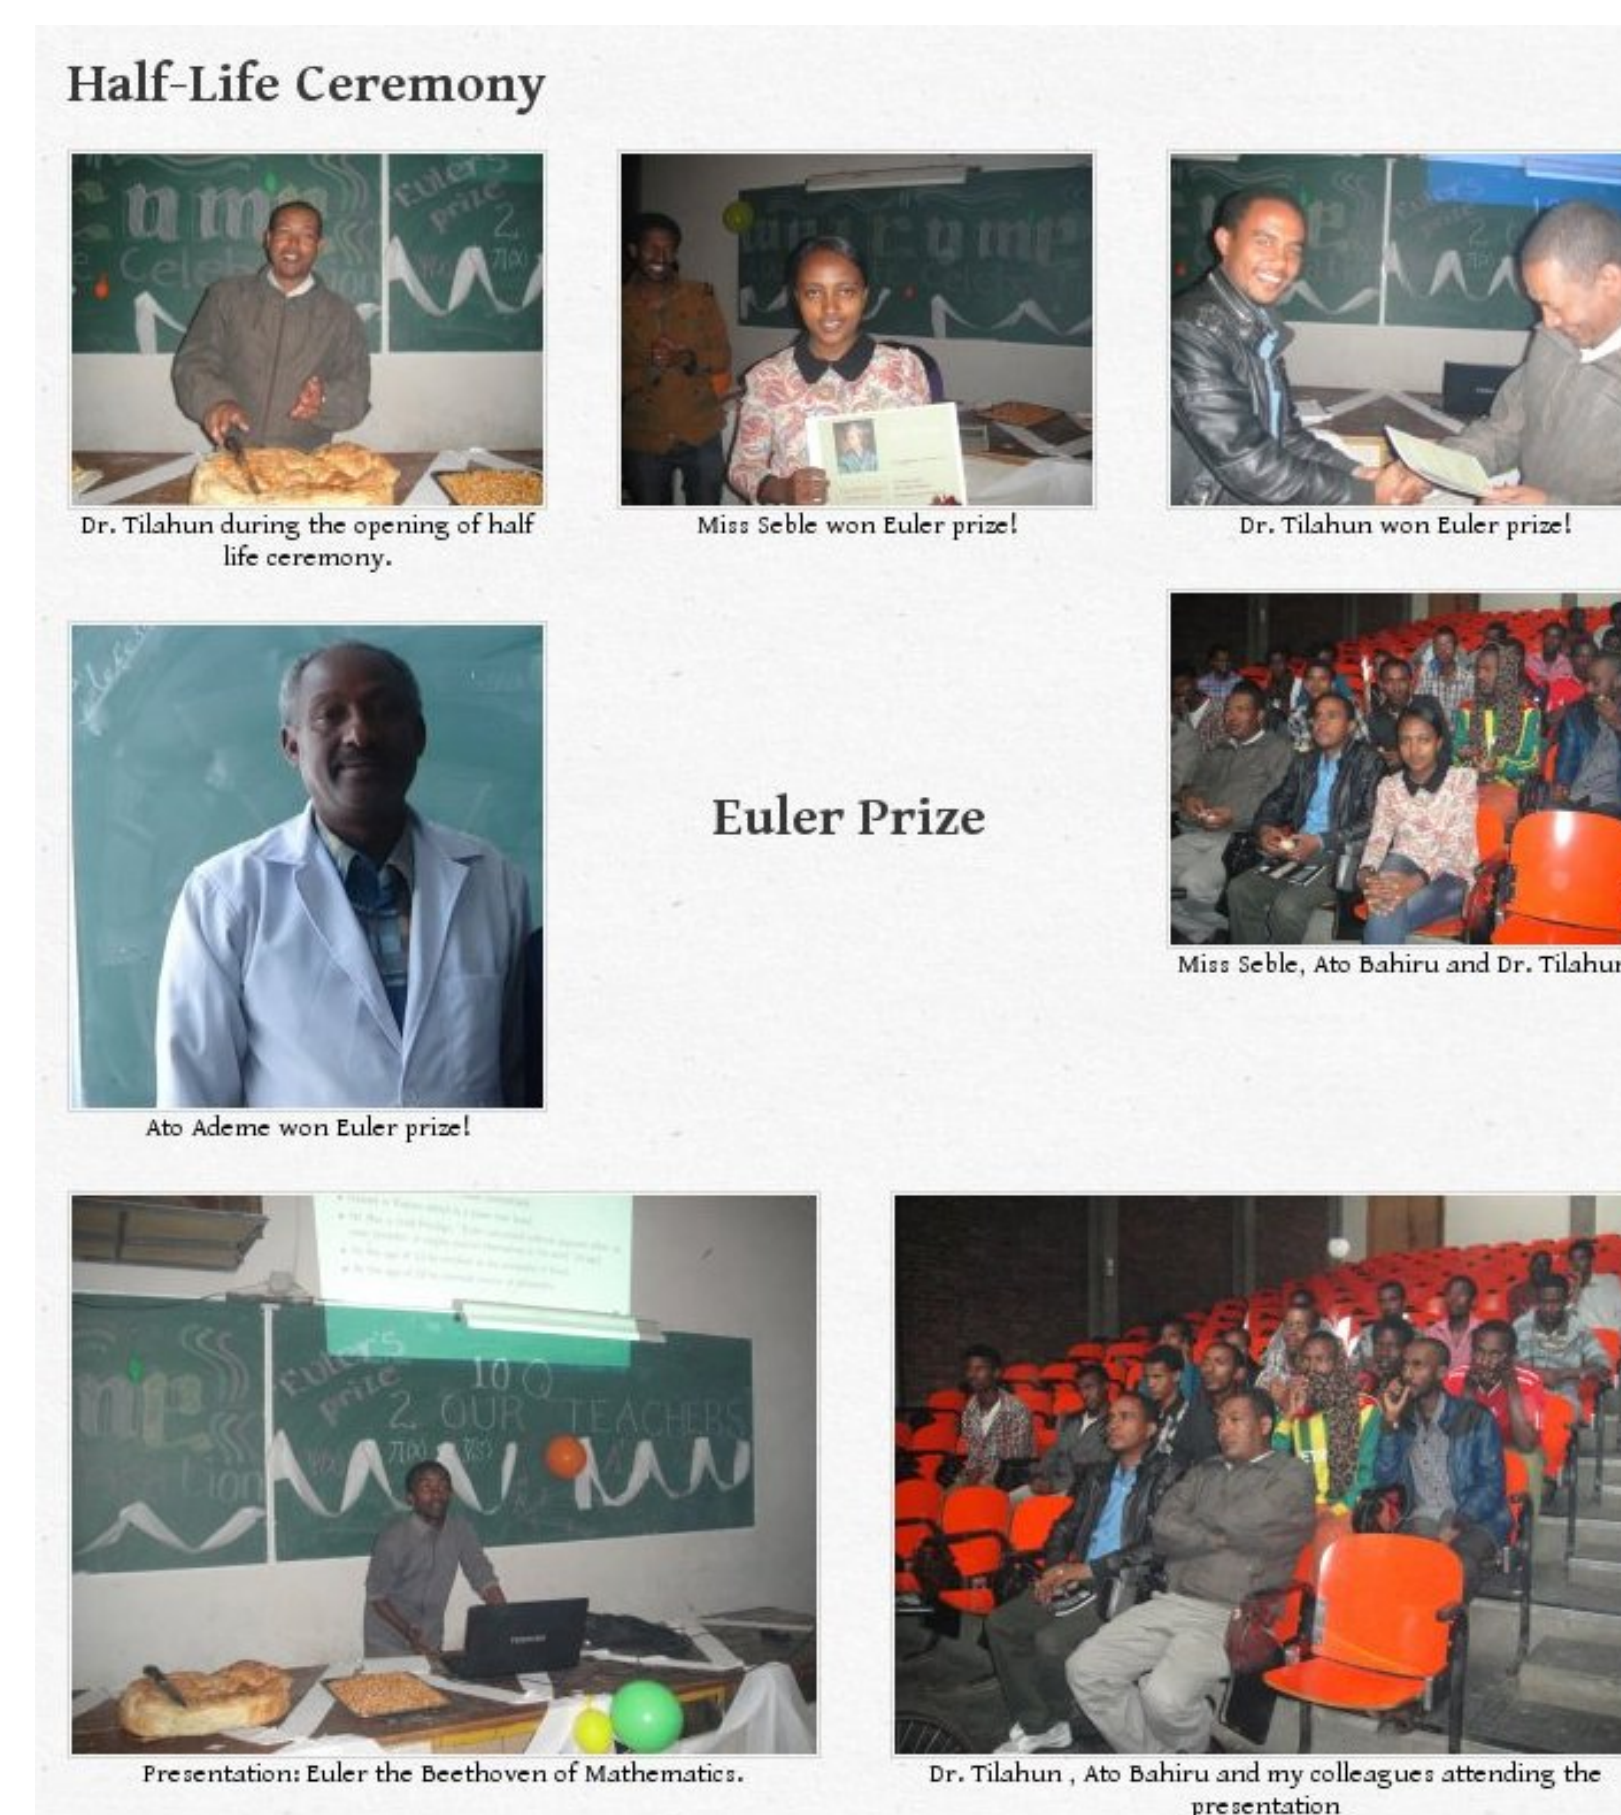

"If you have to begin, begin from the ground. If you have to start, start from your own."

-Anonymous.

Freshman year was quite tough for me. So I asked myself can I make it much simpler for my young brothers? I started thinking about designing a web-page. Immediately I start to collect resources from my teachers[You deserve more than Thank you]. I did everything during the semester break. That is why it took me so long. Anyways here it is finally.

BLOG

At the right corner of the web-page there is a blog which is created to provide news, and announcement like Seminar and special events.

I need you to contribute for this blog. If there is anything that you think important, please forward it. Let's share what we know!

FUTURE PLAN

- To provide more resources.
- To make the page attractive and easily accessible.

OVERVIEW
